

A Leader in Railroad Construction, Maintenance, and Repair Services

Full-service Railroad Contractor

Ameritrack Rail is a full service rail contractor providing its customers with engineering and design services, new track construction, existing track maintenance and 24/7 emergency service. From our offices in Indiana, Kansas, and Texas, we service customers throughout the contiguous United States.

Excellent Service & Quality Work at a Competitive Price

Our goals are simple. Work safely and work efficiently to provide a quality service at a fair price. We identify and perform the work that is necessary to keep your system in perpetually safe operating condition. Track construction, maintenance, and repair is our core competency.

New Rail Construction

We specialize in constructing new rail systems, whether short extensions or miles of track. No job is too small or too large. We address your unique railroad needs, such as installation over grain dumps, load outs, road crossings and scales.

- New track construction
- Turnout installations
- Derail installations
- Crossing installations
- Bumping post installations
- Installing rail over scales
- Installing rail through buildings
- Final surfacing with production tamper and regulator

New Track Design Services

Save yourself a lot of time and expense by taking advantage of our in-house design engineers. Our professional design team assures that your new project is up and running quickly while meeting all proper technical specifications.

- Design your rail system to meet your serving rail carrier's design criteria
- Submit rail plans for construction approval
- Survey existing track system

Equipment

Ameritrack owns all the necessary rail equipment to meet any of your construction or maintenance needs.
